Desk Top Xray Diffraction

Low cost XRD for everyone

Spectrolab have been supplying and manufacturing Xray Diffraction for many years mostly specialising in real time XRD using PSD detectors. We now offer a range of products for research and QA applications including upgrades to existing XRD instruments, spares, inexpensive Xray tubes and real time PSD detectors

The model XL-20 is an inexpensive desk top power diffraction system designed for multiple applications including QA, QC and research. Systems are available employing an ultra fast array detector manufactured by Mythen is included as standard. The XL20 comes with a wide range of accessories allowing it to be used in both universities and industry.
