We supply the finest Raman systems in the world

Raman Special from Spectrolab

Laserspec 2000

A new Rugged Inexpensive Portable Raman with fibre probe

Spectrolab first started producing Raman systems in 1975 and were the first company in the world to develop Raman Optical Activity, CARS, double Raman spectrographs, medical Raman diagnostics and Raman laser filter monochromators. Our current range of products is just as exceptional with products for QA in industry, hand held Raman, desk top models, instruments for mineralogy, gem stone analysis, Raman detectors for HPLC products, microscopes, drug analysis, explosives and research. We also have medical in vivo/ vitreo Raman analyses, first defender systems, SERS Raman, variable temperature stages, high pressure cells, data bases, fibre optic probes and much more....

See attached.....

Including a wide range of hand-held and portable analysers with exceptional performance at all excitation wavelengths including infrared
Plus new systems for drug abuse using hair analysis

The only game in town

XRD, XRF, HPLC, GC, FTIR, OES, UV-Vis, ICP, AAS,
Raman, Nano Analysis, TOC, Microscopes, SEM, Digesters
